

STATE OF CALIFORNIA
 CALIFORNIA ENVIRONMENTAL PROTECTION AGENCY
 STATE WATER RESOURCES CONTROL BOARD

DIVISION OF WATER RIGHTS

PERMIT FOR DIVERSION AND USE OF WATER

PERMIT 20848

Application 29670 of Bernie L. Millsaps and Louann Millsaps

3287 County Road 313, Orland, CA 95963

filed on March 2, 1990, has been approved by the State Water Resources Control Board
 SUBJECT TO PRIOR RIGHTS and to the limitations and conditions of this permit.

Permittee is hereby authorized to divert and use water as follows:

- | | |
|--|---|
| 1. Source:

<u>Unnamed Stream</u>

_____ | Tributary to:

<u>Watson Creek thence</u>

<u>Grindstone Creek thence</u>

<u>Stony Creek thence</u>

<u>Sacramento River</u>

_____ |
|--|---|

2. Location of point of diversion:	40-acre subdivision of public land survey or projection thereof	Section	Township	Range	Base and Meridian
By California Coordinate System, Zone 2 North 737,900 feet and East 1,849,900 feet	NE $\frac{1}{4}$ of SE $\frac{1}{4}$	9	21N	6W	MD

County of Glenn

3. Purpose of use:	4. Place of use:	Section	Township	Range	Base and Meridian	Acres
Stockwatering	Unnamed Reservoir in NE¼ of SE¼	9	21N	6W	MD	
Irrigation	NE¼ of SE¼	9	21N	6W	MD	8

The place of use is shown on map on file with the State Water Resources Control Board.

5. The water appropriated shall be limited to the quantity which can be beneficially used and shall not exceed 22 acre-feet per annum to be collected from November 30 of each year to March 15 of the succeeding year.

This permit does not authorize collection of water to storage outside of the specified season to offset evaporation and seepage losses or for any other purpose. (0000005)

6. The amount authorized for appropriation may be reduced in the license if investigation warrants. (0000006)

7. Complete application of the water to the authorized use shall be made by December 31, 2005. (0000008)

8. Progress reports shall be submitted promptly by permittee when requested by the State Water Resources Control Board until a license is issued. (0000010)

9. Permittee shall allow representatives of the State Water Resources Control Board and other parties, as may be authorized from time to time by said Board, reasonable access to project works to determine compliance with the terms of this permit. (0000011)

10. Pursuant to California Water Code Sections 100 and 275, and the common law public trust doctrine, all rights and privileges under this permit and under any license issued pursuant thereto, including method of diversion, method of use, and quantity of water diverted, are subject to the continuing authority of the State Water Resources Control Board in accordance with law and in the interest of the public welfare to protect public trust uses and to prevent waste, unreasonable use, unreasonable method of use, or unreasonable method of diversion of said water.

The continuing authority of the Board may be exercised by imposing specific requirements over and above those contained in this permit with a view to eliminating waste of water and to meeting the reasonable water requirements of permittee without unreasonable draft on the source. Permittee may be required to implement a water conservation plan, features of which may include but not necessarily be limited to (1) reusing or reclaiming the water allocated; (2) using water reclaimed by another entity instead of all or part of the water allocated; (3) restricting diversions so as to eliminate agricultural tailwater or to reduce

return flow; (4) suppressing evaporation losses from water surfaces; (5) controlling phreatophytic growth; and (6) installing, maintaining, and operating efficient water measuring devices to assure compliance with the quantity limitations of this permit and to determine accurately water use as against reasonable water requirements for the authorized project. No action will be taken pursuant to this paragraph unless the Board determines, after notice to affected parties and opportunity for hearing, that such specific requirements are physically and financially feasible and are appropriate to the particular situation.

The continuing authority of the Board also may be exercised by imposing further limitations on the diversion and use of water by the permittee in order to protect public trust uses. No action will be taken pursuant to this paragraph unless the Board determines, after notice to affected parties and opportunity for hearing, that such action is consistent with California Constitution Article X, Section 2; is consistent with the public interest; and is necessary to preserve or restore the uses protected by the public trust. (0000012)

11. The quantity of water diverted under this permit and under any license issued pursuant thereto is subject to modification by the State Water Resources Control Board if, after notice to the permittee and an opportunity for hearing, the Board finds that such modification is necessary to meet water quality objectives in water quality control plans which have been or hereafter may be established or modified pursuant to Division 7 of the Water Code. No action will be taken pursuant to this paragraph unless the Board finds that (1) adequate waste discharge requirements have been prescribed and are in effect with respect to all waste discharges which have any substantial effect upon water quality in the area involved, and (2) the water quality objectives cannot be achieved solely through the control of waste discharges. (0000013)

12. Rights under this permit are, and shall be, specifically subject to existing rights determined by the Angle Decree, Equity No. 30, United States District Court, insofar as said adjudicated rights are maintained. If Black Butte Reservoir does not collect to storage its authorized diversion, permittee shall release any water collected during the current season. The permittee is allowed to retain any water in the reservoir from previous water years. (0000023)

13. Permittee shall install and maintain an outlet pipe of adequate capacity in the dam as near as practicable to the bottom of the natural stream channel, or provide other means satisfactory to the State Water Resources Control Board, in order that water entering the reservoir which is not authorized for appropriation under this permit can be released. (0050043)

14. Permittee shall install and properly maintain in the reservoir a staff gage, satisfactory to the State Water Resources Control Board, for the purpose of determining water levels in the reservoir.

Permittee shall record the staff gage reading on or about October 1 of each year. Such reading shall be supplied to the State Water Resources Control Board with the next progress report submitted to the Board by permittee.

The State Water Resources Control Board may require the release of water which cannot be verified as having been collected to storage prior to October 1 of each year.

Permittee shall allow United States Bureau of Reclamation and all successors in interest, or a designated representative, reasonable access to each reservoir for the purpose of verifying staff gage reading and determining water levels in the reservoir. In no event shall permittee be obligated to release water below the previous October staff gage reading. (0070047)
(0100047)

15. This permit is subject to prior downstream rights, including those defined in the Angle Decree, Equity No. 30. Permittee shall allow access to project facilities to the Watermaster appointed by the United States District Court for the Eastern District of California to determine compliance with the terms of this permit. In diverting and storing water, permittee shall comply with orders of the Watermaster, including orders to release water stored adverse to prior downstream rights, unless otherwise directed by the State Water Resources Control Board or its representatives. Permittee shall pay any assessments for its proportionate share of the cost of watermaster service which have been approved by the United States District Court. (0000092)

16. Use of water under this permit shall have priority over any water stored in Black Butte Reservoir (Application 18115) that is used outside Glenn County. (0000999)

This permit is issued and permittee takes it subject to the following provisions of the Water Code:

Section 1390. A permit shall be effective for such time as the water actually appropriated under it is used for a useful and beneficial purpose in conformity with this division (of the Water Code), but no longer.

Section 1391. Every permit shall include the enumeration of conditions therein which in substance shall include all of the provisions of this article and the statement that any appropriator of water to whom a permit is issued takes it subject to the conditions therein expressed.

Section 1392. Every permittee, if he accepts a permit, does so under the conditions precedent that no value whatsoever in excess of the actual amount paid to the State therefor shall at any time be assigned to or claimed for any permit granted or issued under the provisions of this division (of the Water Code), or for any rights granted or acquired under the provisions of this division (of the Water Code), in respect to the regulation by any competent public authority of the services or the price of the services to be rendered by any permittee or by the holder of any rights granted or acquired under the provisions of this division (of the Water Code) or in respect to any valuation for purposes of sale to or purchase, whether through condemnation proceedings or otherwise, by the State or any city, city and county, municipal water district, irrigation district, lighting district, or any political subdivision of the State, of the rights and property of any permittee, or the possessor of any rights granted, issued, or acquired under the provisions of this division (of the Water Code).

Dated: June 18, 1996
